

## Continuous Insert Moulding

### Example of product: Micro Switch

The micro-switch is used as volume controller in mobile phones.

The partially gold-plated strip measuring 0.15 mm in thickness is continuously fed for insert moulding; it is then delivered on reels for best possible integration into the customer's production process.

Consequent quality controls as well as monitoring by camera are a guarantee for ppm-values of under 30.

### Technical Data

<b>Plastic</b>	PA - Durethan BKV 30H
<b>Strip</b>	Cu Sn6 bronze gold-plated
<b>Injection moulding tool</b>	8 cavities
<b>Type of gating</b>	Stripper plate mould
